(4) The credit under sub-rule (1) shall be available against the amount of tax, surcharge and cess payable under the Act, but not in respect of any sum payable by way of interest, fee or penalty.

(5) No credit under sub-rule (1) shall be available in respect of any amount of foreign tax or part thereof, which is disputed in any manner by the assessee, subject to the provisions of sub-rule (6).

(6) If the assessee, within six months from the end of the month in which the dispute is finally settled, furnishes evidence of settlement of dispute and an evidence to the effect that the liability for payment of such foreign tax has been discharged by him and furnishes an undertaking that no refund in respect of such amount has directly or indirectly been claimed or shall be claimed, the credit of such disputed tax shall be allowed for the year in which such income is offered to tax or assessed to tax in India.

(7) The credit of foreign tax shall be the aggregate of the amounts of credit computed separately for each source of income arising from a particular country or specified territory outside India and shall be given effect to in the following manner: —

- (a) the credit shall be the lower of the tax payable under the Act on such income and the foreign tax paid on such income, so, however, that where the foreign tax paid exceeds the amount of tax payable in accordance with the provisions of the agreement for relief or avoidance of double taxation, such excess shall be ignored;
- (b) the credit shall be determined by conversion of the currency of payment of foreign tax at the telegraphic transfer buying rate on the last day of the month immediately preceding the month in which such tax has been paid or deducted.

(8) In a case where any tax is payable under the provisions of section 206, the credit of foreign tax shall be allowed against such tax in the same manner as is allowable against any tax payable under the provisions of the Act other than the provisions of the said sections (herein referred to as the normal provisions).

(9) Where the amount of foreign tax credit available against the tax payable under the provisions of section 206 exceeds the amount of tax credit available against the normal provisions, then, while computing the amount of credit under section 206(1)(m) to (p) and section 206(2)(e) to (h), in respect of the taxes paid under section 206(1) and (2), as the case may be, such excess shall be ignored.

- (10) Credit of any foreign tax shall be allowed on furnishing the following documents by the assessee: —
- (a) a statement of income from the country or specified territory outside India offered for tax for the tax year and of foreign tax deducted or paid on such income in Form No. 44 and verified in the manner specified therein; and
 - (b) certificate or statement specifying the nature of income and the amount of tax deducted therefrom or paid by the assessee, —
 - (i) from the tax authority of the country or specified territory outside India; or
 - (ii) from the person responsible for deduction of such tax; or
 - (iii) signed by the assessee.
- (11) The certificate or statement furnished by the assessee in sub-rule (10)(b) shall be valid, if it is accompanied by —
- (a) an acknowledgement of online payment or bank counter foil or challan for payment of tax where the payment has been made by the assessee; or
 - (b) proof of deduction, where the tax has been deducted.
- (12) The statement in Form No. 44 referred to in sub-rule (10)(a) and the certificate or the statement referred to in sub-rule (10)(b) shall be furnished within twelve months from the end of the relevant tax year in which the income referred to in sub-rule (1) has been offered to tax or assessed to tax in India and the return for such tax year has been furnished within the time specified under section 263(1) or (4), subject to the provisions of sub-rule (13).
- (13) Where the return has been furnished under section 263(6)(a), the statement in Form No. 44 referred to in sub-rule (10)(a) and the certificate or the statement referred to in sub-rule (10)(b), to the extent it relates to the income included in the updated return, shall be furnished on or before the date on which such return is furnished.
- (14) Form No. 44 shall also be furnished in a case, where the carry backward of loss of the current year or revision of return or similar statement, the case may be, of any year or any other reason results in refund of foreign tax for which credit has been claimed in any tax year or tax years.
- (15) For the purposes of sub-rule (6), the assessee shall furnish an intimation in Form No. 45 and evidence of settlement of dispute including evidence of payment of tax.
- (16) Form No. 44 shall be verified by an accountant defined in section 515(3)(b), —
- (a) where the assessee is a company; or
 - (b) in all other cases, where the amount of foreign tax paid outside India for a tax year equals or exceeds ₹ 100000.
- (17) Form No. 45 shall be verified by an accountant defined in section 515(3)(b) in a case, where Form No. 44 filed for the relevant tax year was required to be verified by an accountant under sub-rule (16).
- (18) For the purposes of this rule, the expression “telegraphic transfer buying rate” shall have the meaning assigned to it in rule 207.
- 77. Meaning of expressions used in determination of arm’s length price.**— For the purpose of this rule and rules 78 to 84, —
- (a) “associated enterprise” shall have the meaning assigned to it in section 162;
 - (b) “enterprise” shall have the meaning assigned to it in section 173(b) and shall, for the purposes of a specified domestic transaction, include a unit, or an enterprise, or an undertaking or a business of a person who undertakes such transaction;
 - (c) “property” includes goods, articles or things, and intangible property;

- (d) “services” include financial services;
- (e) “transaction” includes a number of closely linked transactions; and
- (f) “uncontrolled transaction” means a transaction between enterprises other than associated enterprises, whether resident or non-resident.

78. Other method for determination of arm's length price.— For the purposes of section 165(1)(f), the other method for determination of the arm's length price in relation to an international transaction or a specified domestic transaction shall be any method which takes into account the price, which —

- (a) has been charged or paid; or
- (b) would have been charged or paid,

for the same or similar uncontrolled transaction, with or between non-associated enterprises, under similar circumstances, considering all the relevant facts.

79. Determination of arm's length price under section 165.— (1) For the purposes of section 165(2), the arm's length price in relation to an international transaction or a specified domestic transaction shall be determined by any of the following methods provided in this sub-rule, being the most appropriate method, in the manner specified therein.

- (a) comparable uncontrolled price method, by which, —
 - (i) the price charged or paid for property transferred or services provided in a comparable uncontrolled transaction, or a number of such transactions, is identified;
 - (ii) such price is adjusted to account for differences, if any, between an international transaction or a specified domestic transaction and the comparable uncontrolled transactions or between the enterprises entering into such transactions, which could materially affect the price in the open market; and
 - (iii) the adjusted price arrived at under sub-clause (ii) is taken to be an arm's length price in respect of the property transferred or services provided in the international transaction or the specified domestic transaction; or
- (b) resale price method, by which, —
 - (i) the price at which property purchased or services obtained by the enterprise from an associated enterprise is resold or are provided to an unrelated enterprise, is identified;
 - (ii) such resale price is reduced by the amount of a normal gross profit margin accruing to the enterprise or to an unrelated enterprise from the purchase and resale of the same or similar property or from obtaining and providing the same or similar services, in a comparable uncontrolled transaction, or a number of such transactions;
 - (iii) the price so arrived at is further reduced by the expenses incurred by the enterprise directly in connection with the purchase of property or obtaining of services;
 - (iv) the price so arrived at is adjusted to take into account the functional and other differences, including differences in accounting practices, if any, between the international transaction or the specified domestic transaction and the comparable uncontrolled transactions, or between the enterprises entering into such transactions, which could materially affect the amount of gross profit margin in the open market; and
 - (v) the adjusted price arrived at under sub-clause (iv) is taken to be an arm's length price in respect of the transaction of purchase of property or obtaining of the services by the enterprise from its associated enterprise; or
- (c) cost plus method, by which, —
 - (i) the direct and indirect costs of production incurred by the enterprise in respect of property transferred or services provided to an associated enterprise, are determined;

- (ii) the amount of a normal gross profit mark-up on such costs (computed according to the same accounting norms) arising from the transfer or provision of the same or similar property or services by the enterprise, or by an unrelated enterprise, in a comparable uncontrolled transaction, or a number of such transactions, is determined;
- (iii) the normal gross profit mark-up referred to in sub-clause (ii) is adjusted to take into account the functional and other differences, if any, between the international transaction or the specified domestic transaction and the comparable uncontrolled transactions, or between the enterprises entering into such transactions, which could materially affect such profit mark-up in the open market;
- (iv) the costs referred to in sub-clause (i) are increased by the adjusted profit mark-up arrived at under sub-clause (iii); and
- (v) the sum so arrived at is taken to be an arm's length price in relation to the supply of the property or provision of services by the enterprise; or
- (d) profit split method, which may be applicable mainly, in, —
- (i) an international transaction or a specified domestic transaction involving either the transfer of unique intangibles or unique and valuable contributions by each of the enterprises involved in the transaction; or
- (ii) multiple international transactions or specified domestic transactions which are so inter-related that they cannot be evaluated separately for the purpose of determining the arm's length price of any one transaction, under which the following two approaches may be used —
- (A) contribution profit split method, by which, —
- (I) the combined net profit of the associated enterprises arising from the international transaction or the specified domestic transaction in which they are engaged, is determined;
- (II) the relative contribution made by each of the associated enterprises to the earning of such combined net profit, is then evaluated on the basis of the functions performed, assets employed or to be employed and risks assumed by each enterprise and on the basis of reliable external market data, which indicates how such contribution would be evaluated by unrelated enterprises performing comparable functions in similar circumstances;
- (III) the combined net profit is then split amongst the enterprises in proportion to their relative contributions, as evaluated under sub-item (II); and
- (IV) the profit thus apportioned to the assessee is taken into account to arrive at an arm's length price in relation to the international transaction or the specified domestic transaction;
- (B) residual profit split method, by which, —
- (I) the combined net profit of the associated enterprises arising from the international transaction or the specified domestic transaction in which they are engaged, is determined;
- (II) the combined net profit referred to in sub-item (I) may, in the first instance, be partially allocated to each enterprise so as to provide it with an arm's length return appropriate for the contributions which can be reliably benchmarked using comparable uncontrolled transactions,
- (III) the residual net profit remaining after such allocation may be split amongst the enterprises in proportion to their relative contributions in the manner specified under items (II) and (III) of item (A); and
- (IV) the aggregate of the net profit allocated to the enterprise for contributions which can be reliably benchmarked using comparable uncontrolled transactions in together with the residual net profit apportioned to that enterprise on the basis of its relative

contributions shall be taken into account to arrive at an arm's length price in relation to the international transaction or the specified domestic transaction; or

- (e) transactional net margin method, by which, —
- (i) the net profit margin realised by the enterprise from an international transaction or a specified domestic transaction entered into with an associated enterprise is computed in relation to costs incurred or sales effected or assets employed or to be employed by the enterprise or having regard to any other relevant base;
 - (ii) the net profit margin realised by the enterprise or by an unrelated enterprise from a comparable uncontrolled transaction or a number of such transactions is computed having regard to the same base;
 - (iii) the net profit margin referred to in sub-clause (ii) arising in comparable uncontrolled transactions is adjusted to take into account the differences, if any, between the international transaction or the specified domestic transaction and the comparable uncontrolled transactions, or between the enterprises entering into such transactions, which could materially affect the amount of net profit margin in the open market;
 - (iv) the net profit margin realised by the enterprise and referred to in sub-clause (i) is established to be the same as the net profit margin referred to in sub-clause (iii); and
 - (v) the net profit margin thus established is then taken into account to arrive at an arm's length price in relation to the international transaction or the specified domestic transaction; or
- (f) any other method as provided in rule 78.
- (2) For the purposes of sub-rule (1), the comparability of an international transaction or a specified domestic transaction with an uncontrolled transaction shall be judged with reference to the following factors (herein referred to as the comparability factors): —
- (a) the characteristics of the property transferred or services provided in either transaction;
 - (b) the functions performed, taking into account assets employed or to be employed and the risks assumed, by the respective parties to the transactions;
 - (c) the contractual terms (whether or not such terms are formal or in writing) of the transactions which lay down explicitly or implicitly how the responsibilities, risks and benefits are to be divided between the respective parties to the transactions; and
 - (d) the conditions prevailing in the markets in which the respective parties to the transactions operate, including the geographical location, depth and size of the markets, the laws and Government orders in force, costs of labour and capital in the markets, overall economic development, level of competition and whether the markets are wholesale or retail.
- (3) An uncontrolled transaction shall be comparable to an international transaction or a specified domestic transaction, if—
- (a) none of the differences, if any, between the transactions being compared, or between the enterprises entering into such transactions, are likely to materially affect the price or cost charged or paid in, or the profit arising from, such transactions in the open market; or
 - (b) reasonably accurate adjustments can be made to eliminate the material effects of such differences.
- (4) The data to be used in analysing the comparability of an uncontrolled transaction with an international transaction or a specified domestic transaction shall be the data relating to the financial year (hereinafter in this rule and in rule 81 referred to as the current year) in which the international transaction or the specified domestic transaction.

(5) In a case where the most appropriate method for determination of the arm's length price of an international transaction or a specified domestic transaction is resale price method or cost-plus method or transactional net margin method, then, irrespective of anything contained in sub-rule (4), the data to be used for analysing the comparability of an uncontrolled transaction with an international transaction or a specified domestic transaction shall be —

- (a) the data relating to the current year; or
- (b) the data relating to the first preceding year, if the data relating to the current year is not available at the time of furnishing the return of income by the assessee for the tax year; and where the data relating to the current year is subsequently available at the time of determination of arm's length price of an international transaction or a specified domestic transaction during the course of any assessment proceeding for the tax year, then, such data shall be used for such determination irrespective of the fact that the data was not available at the time of furnishing the return of income of the relevant tax year.

80. Most appropriate method.— (1) For the purposes of section 165(2)(a), the most appropriate method shall be the method which is best suited to the facts and circumstances of each particular international transaction or specified domestic transaction and which provides the most reliable measure of an arm's length price in relation to the international transaction or the specified domestic transaction, as the case may be.

(2) The following factors shall be taken into account for selecting the most appropriate method: —

- (a) the nature and class of the international transaction or the specified domestic transaction;
- (b) the class or classes of associated enterprises entering into the transaction and the functions performed by them taking into account assets employed or to be employed and risks assumed by such enterprises;
- (c) the availability, coverage and reliability of data necessary for application of the method;
- (d) the degree of comparability existing between the international transaction or the specified domestic transaction and the uncontrolled transaction and between the enterprises entering into such transactions;
- (e) the extent to which reliable and accurate adjustments can be made to account for differences, if any, between the international transaction or the specified domestic transaction and the comparable uncontrolled transaction or between the enterprises entering into such transactions; and
- (f) the nature, extent and reliability of assumptions required to be made in application of a method.

81. Determination of arm's length price in certain cases.— (1) Where in respect of an international transaction or a specified domestic transaction, the application of the most appropriate method referred to in section 165(3)(b) results in determination of more than one price, the arm's length price in respect of such transactions shall be computed in accordance with the provisions of this rule.

(2) A dataset shall be constructed by placing the prices referred to in sub-rule (1) in an ascending order and the arm's length price shall be determined on the basis of the dataset so constructed.

(3) For the purposes of sub-rule (2), where the most appropriate method is the resale price method, cost plus method, or transactional net margin method, and where the comparable uncontrolled transaction undertaken by an enterprise, not being the enterprise undertaking such transactions referred to in sub-rule (1), has been identified using data relating to—

- (a) the current year, and the said enterprise has undertaken the same or similar comparable uncontrolled transaction, in either or both of the two financial years immediately preceding the current year, then, —
 - (i) the price in respect of such transaction in such year (or years) shall be determined by applying the most appropriate method in the similar manner as applied in the current year; and
 - (ii) the weighted average of such prices, as computed under sub-rule (5), shall be included in the dataset under sub-rule (2) instead of price referred to in sub-rule (1);

(b) the financial year immediately preceding the current year (if the data relating to current tax year is not available at the time of furnishing return of income for that year), and the said enterprise has undertaken the same or similar comparable uncontrolled transaction in the financial year immediately preceding the two financial years, then—

(i) the price in respect of such transaction shall be determined by applying the most appropriate method in the similar manner as it was applied in the financial year immediately preceding the current year; and

(ii) the weighted average of such prices, as computed under sub-rule (5), shall be included in the dataset under sub-rule (2) instead of price referred to in sub-rule (1).

(4) Where the use of data relating to the current year, in terms of rule 79(5), establishes that—

(a) the enterprise has not undertaken the same or similar uncontrolled transaction during the current year; or

(b) the uncontrolled transaction undertaken during the current year is not a comparable uncontrolled transaction,

then, irrespective of anything else, neither the price nor the weighted average of prices of the comparable uncontrolled transactions shall be included in the dataset.

(5) Where an enterprise has undertaken comparable uncontrolled transactions in more than one financial year, the weighted average of the prices of such transactions for the purposes of sub-rules (2), (3) and (4) shall be computed based on the method used for determination of prices as specified in column B of the following Table and by assigning weights to the factors specified in column C thereof: —

Table

Sl. No.	Method	Factors to which weight is assigned
A	B	C
1.	Resale price method.	Quantum of sales considered for arriving at the respective prices.
2.	Cost plus method.	Quantum of costs considered for arriving at the respective prices.
3.	Transactional net margin method.	Quantum of costs incurred, sales effected, assets employed or to be employed, or any other base considered for arriving at the respective prices.

(6) Where the most appropriate method is comparable uncontrolled price method or resale price method or cost plus method or transactional net margin method and the dataset constructed in accordance with sub-rule (2) consists of six or more entries, an arm's length range beginning from the 35th percentile of the dataset and ending on the 65th percentile of the dataset shall be constructed and, if the price at which the international transaction or the specified domestic transaction has actually been undertaken is —

(a) within such arm's length range, such price shall be deemed to be the arm's length price;

(b) outside such arm's length range, the median of the dataset shall be used to compute the arm's length price.

(7) Where the provisions of sub-rule (6) are not applicable, the arm's length price shall be —

(a) the arithmetical mean of all the values included in the dataset; or

(b) the price at which such transaction has actually been undertaken, if the variation between the arm's length price so determined and the price at which the international transaction or the specified domestic transaction has actually been undertaken does not exceed such percentage, not exceeding 3% of the latter, as may be notified in this behalf by the Central Government.

(8) For the purposes of this rule, —

(a) "median" of the dataset, having values arranged in an ascending order, shall be —

(i) the lowest value in the dataset where at least 50% of the values are less than or equal to it; or

- (ii) the arithmetic mean of such lowest value and the value immediately succeeding it in the dataset, if the number of all values that are equal to or less than the aforesaid value is a whole number;
- (b) (i) “35th percentile” of a dataset, having values arranged in an ascending order, shall be —
- (A) the lowest value in the dataset such that at least 35% of the values included in the dataset are equal to or less than such value; or
- (B) the arithmetic mean of such lowest value and the value immediately succeeding it in the dataset, if the number of all values that are equal to or less than the aforesaid value is a whole number; and
- (ii) “65th percentile” of a dataset, having values arranged in an ascending order, shall be —
- (A) the lowest value in the dataset such that at least 65% of the values included in the dataset are equal to or less than such value; or
- (B) the arithmetic mean of such lowest value and the value immediately succeeding it in the dataset, if the number of all values that are equal to or less than the aforesaid value is a whole number.

Illustration 1

Enterprise X has undertaken controlled transaction with its associated enterprises during the current year. After taking into account the facts and circumstances, transactional net margin method has been selected as the most appropriate method, enterprise X has been selected as the tested party, and the ratio of operating profit (OP) to operating expense (OE) has been selected as the profit level indicator (PLI). The data of the comparable uncontrolled transactions is available for the current year under consideration at the time of furnishing return of income by the assessee and based on the same, seven non-associated enterprises have been identified to have undertaken the comparable uncontrolled transactions in the current year. All the identified comparable enterprises have also undertaken comparable uncontrolled transactions in a period of two years preceding the current year. The weighted average PLI calculation for each non-associated enterprise shall be as follows:

Sl. No.	Name of non-associated enterprise	Year 1	Year 2	Year 3 [Current Year]	Aggregation of OE and OP	Weighted Average PLI
1	2	3	4	5	6	7
1.	A	OE = 100	OE = 150	OE = 225	Total OE = 475	OP/OE = 12%
		OP = 12	OP = 10	OP = 35	Total OP = 57	
2.	B	OE = 80	OE = 125	OE = 100	Total OE = 305	OP/OE = 8.2%
		OP = 10	OP = 5	OP = 10	Total OP = 25	
3.	C	OC=E = 250	OE = 230	OE = 250	Total OE = 730	OP/OE= 9%
		OP = 22	OP = 26	OP = 18	Total OP = 66	
4.	D	OE = 180	OE= 220	OE = 150	Total OE = 550	OP/OE = 6%
		OP = (-)9	OP = 22	OP = 20	Total OP = 33	
5.	E	OE = 140	OE = 100	OE = 125	Total OE = 365	OP/OE = 2.2%
		OP = 21	OP = (-) 8	OP = (-) 5	Total OP = 8	

6.	F	OE = 160	OE = 120	OE = 140	Total OE = 420	OP/OE = 11.9%
		OP = 21	OP = 14	OP = 15	Total OP = 50	
7.	G	OE = 150	OE = 130	OE = 155	Total OE = 435	OP/OE = 10.57%
		OP = 21	OP = 12	OP = 13	Total OP = 46	

From the above, the dataset will be constructed by arranging the weighted average values of PLI in an ascending order as follows:

Sl. No.	1	2	3	4	5	6	7
Values	2.2%	6%	8.2%	9%	10.57%	11.9%	12%

For deriving the arm's length range, the data place of 35th and 65th percentile shall be computed in the following manner:

Total number of data points in dataset $\times (35/100)$

Total number of data points in dataset $\times (65/100)$

Thus, the data place of the 35th percentile = $7 \times 0.35 = 2.45$.

Since this is not a whole number, the next higher data place, that is, the value at the 3rd place would have at least 35% of the values below it. The 35th percentile, is therefore, value at the 3rd place, that is, 8.2%.

The data place of the 65th percentile is = $7 \times 0.65 = 4.55$.

Since this is not a whole number, the next higher data place, that is, the value at the 5th place would have at least 65% of the values below it. The 65th percentile is therefore value at 5th place, that is, 10.57%.

The arm's length range will be beginning at 8.2% and ending at 10.57%.

Therefore, if the PLI in case of the enterprise X that has undertaken the international transaction or the specified domestic transaction is equal to or more than 8.2% and less than or equal to 10.57%, the price at which such international transaction or the specified domestic transaction has actually been undertaken shall be deemed to be the arm's length price. No adjustment shall be required.

However, if the PLI in case of the enterprise X is lower than the 35th percentile of the arm's length range, that is, 8.2%, then for the purpose of determining the arm's length price, the median of the dataset shall be used. The median will be first determined in the following manner:

The data place of median is calculated by first computing the total number of data point in the dataset $\times (50/100)$. In this case it is $7 \times 0.5 = 3.5$.

Since this is not a whole number, the next higher data place, that is, the value at the 4th place in the dataset would have at least 50% of the values below it (median).

The median in this case is 9%. Therefore, the PLI at arm's length shall be 9% and the controlled transaction shall be adjusted so as to yield this PLI for the controlled enterprise X.

Illustration 2

In case of the Enterprise X referred to in *Illustration 1*, the data of the current year is available only in respect of non-associated enterprises A, C, E, F and G at the time of furnishing the return of income by the assessee. In respect of non-associated enterprises B and D, the data of the financial year preceding the tax year is available at the time of furnishing the return of income and the same has been used to identify comparable uncontrolled transactions undertaken by enterprises B and D. Further, if these seven non-associated enterprises have also undertaken comparable uncontrolled transactions in either or both of the two financial years immediately preceding the tax year then such data has been included in the dataset. The weighted average PLI calculation for each non-associated enterprise shall be as follows:

Sl. No.	Name of non-associated enterprise	Year 1	Year 2	Year 3 [Tax Year]	Aggregation of OE and OP	Weighted Average PLI
1	2	3	4	5	6	7
1	A	OE = 100	OE = 150	OE = 225	Total OE = 475	OP/OE = 12%

		OP = 22	OP = 26	OP = 18	Total OP = 66	
4	D	Data not available	OE = 220	Data not available	Total OE = 220	OP/OE = 10%
			OP = 22		Total OP = 22	
5	E	Data not available	Data not available	OE = 125	Total OE = 125	OP/OE = (-) 4%

7	G	OE = 150	OE = 130	OE = 155	Total OE = 435	OP/OE= 10.57%
		OP = 21	OP = 12	OE = 13	Total OP = 46	

From the above, the dataset will be constructed by arranging the weighted average values of PLI in an ascending order as follows:

Sl. No.	1	2	3	4	5	6	7
Values	(-)4%	7.31%	9%	10%	10.57%	11.9%	12%

If during the course of assessment proceedings, the data of the tax year becomes available and the use of such data indicates that non-associated enterprise B cannot be considered as a comparable under rule 79(3)(ii) and (iii), then the data in respect of enterprise B shall not be included in the dataset. The data for tax year in respect of enterprise D shall be included in the dataset. Further, if the data available at this stage identifies a new comparable uncontrolled transaction undertaken by enterprise H, then, it shall be included in the revised dataset. The weighted average PLI calculation for each non-associated enterprise shall be as below:

Sl. No.	Name of non-associated enterprise	Year 1	Year 2	Year 3 [tax Year]	Aggregation of OE and OP	Weighted Average PLI

From the above, the dataset will be constructed by arranging the weighted average values of PLI in an ascending order as follows:

Sl. No.	1	2	3	4	5	6	7
Values	(-)4%	9%	9.56%	10.57%	11.35%	11.9%	12%

The calculation of the arm's length range and the arm's length price shall then be performed in the same manner as that described in *Illustration 1*.

Illustration 3

In a given case, comparable uncontrolled price method has been selected as the most appropriate method and 20 comparable uncontrolled transactions have been identified. The dataset of 20 prices, arranged in ascending order, is as under:

Sl. No.	Profits (in ₹ Thousands)
1	2
1	42.00
2	43.00
3	44.00
4	44.50
5	45.00
6	45.25

7	47.00
8	48.00
9	48.15
10	48.35
11	48.45
12	48.48
13	48.50
14	49.00
15	49.10
16	49.35
17	49.50
18	49.75
19	50.00
20	50.15

Applying the formula given in the *Illustration 1*, the data place of the 35th and 65th percentile is determined as follows:

35th percentile place = $20 \times (35/100) = 7\text{th}$.

65th percentile place = $20 \times (65/100) = 13\text{th}$.

Since the 35th percentile place is a whole number, it shall be the average of the prices at the 7th and next higher, that is, 8th place. This is $(47000+48000)/2 = ₹ 47500$.

Similarly, the 65th percentile will be average of 13th and 14th place prices. This is $(48500+49000)/2 = ₹ 48750$.

The median of the range (the 50th percentile place) = $20 \times (50/100) = 10\text{th}$

Since the 50th percentile place is a whole number, it shall be the average of the prices at the 10th and next higher, that is, 11th place. This is $(48350+48450)/2 = ₹ 48400$.

Thus, the arm's length range in this case shall be from ₹ 47500 to ₹ 48750.

Consequently, any controlled transaction whose price is equal to or more than ₹ 47500 but less than or equal to ₹ 48750 shall be considered to be within the arm's length range. If such price is not within the arm's length range, then, for the purpose of determining the arm's length price, the median of the dataset shall be used.

that he had some interest in, or was possessed of, the property in question.

(e) where the Tax Recovery Officer is satisfied that the property was, at the said date, in the possession of the defaulter as his own property and not on account of any other person, or was in the possession of some other person in trust for him, or in the occupancy of a tenant or other person paying rent to him, the Tax Recovery Officer shall disallow the claim; and

(f) where a claim or an objection is preferred, the party against whom an order is made may institute a suit in a Civil Court to establish the right, which he claims to the property in dispute; but, subject to the result of such suit (if any), the order of the Tax Recovery Officer shall be conclusive.

5. In the column titled “Tax Jurisdiction”, the Reporting multi-national enterprise (MNE) should list all of the tax jurisdictions in which Constituent Entities of the MNE group are resident for tax purposes. A tax jurisdiction is defined as a State as well as a non-State jurisdiction which has fiscal autonomy. A separate line should be included for all Constituent Entities in the MNE group deemed by the Reporting MNE not to be resident in any tax jurisdiction for tax purposes. Where a Constituent Entity is resident in more than one tax jurisdiction, the applicable tax treaty tie breaker should be applied to determine the tax jurisdiction of residence. Where no applicable tax treaty exists, the Constituent Entity should be reported in the tax jurisdiction of the Constituent Entity’s place of effective management.
6. In the three columns of the template under the heading “Revenues”, the Reporting MNE should report the following information: (i) the sum of revenues of all the Constituent Entities of the MNE group in the relevant tax jurisdiction generated from transactions with associated enterprises; (ii) the sum of revenues of all the Constituent Entities of the MNE group in the relevant tax jurisdiction generated from transactions with independent parties; and (iii) the total of (i) and (ii). Revenues should include revenues from sales of inventory and properties, services, royalties, interest, premiums and any other amounts. Revenues should exclude payments received from other Constituent Entities that are treated as dividends in the payer’s tax jurisdiction.
7. Under the column titled “Profit (Loss) before Income Tax”, the Reporting MNE should report the sum of the profit (loss) before income tax for all Constituent Entities resident for tax purposes in the relevant tax jurisdiction. The profit (loss) before income tax should include all extraordinary income and expense items.
8. Under the column titled “Income Tax Paid (on Cash Basis)”, the Reporting MNE should report the total amount of income tax actually paid during the relevant fiscal year by all Constituent Entities resident for tax purposes in the relevant tax jurisdiction. Taxes paid should include cash taxes paid by the Constituent Entity to the residence tax jurisdiction and to all other tax jurisdictions. Taxes paid should include withholding taxes paid by other entities (associated enterprises and independent enterprises) with respect to payments to the Constituent Entity. Thus, if company A resident in tax jurisdiction A earns interest in tax jurisdiction B, the tax withheld in tax jurisdiction B should be reported by com-

pany A.

9. Under the column titled “Income Tax Accrued – Reportable Accounting Year”, the Reporting MNE should report the sum of the accrued tax expense recorded on taxable profits or losses of the year of reporting of all Constituent Entities resident for tax purposes in the relevant tax jurisdiction. The tax expense should reflect only operations in the reportable accounting year and should not include deferred taxes or provisions for uncertain tax liabilities.
10. Under the column titled “Stated Capital”, the Reporting MNE should report the sum of the stated capital of all Constituent Entities resident for tax purposes in the relevant tax jurisdiction. With regard to permanent establishments, the stated capital should be reported by the legal entity of which it is a permanent establishment unless there is a defined capital requirement in the permanent establishment tax jurisdiction for regulatory purposes.
11. Under the column titled “Accumulated Earnings”, the Reporting MNE should report the sum of the total accumulated earnings of all Constituent Entities resident for tax purposes in the relevant tax jurisdiction as of the end of the year. With regard to permanent establishments, accumulated earnings should be reported by the legal entity of which it is a permanent establishment.
12. Under the column titled “Number of Employees”, the Reporting MNE should report the total number of employees on a full-time equivalent (FTE) basis of all Constituent Entities resident for tax purposes in the relevant tax jurisdiction. The number of employees may be reported as of the year-end, on the basis of average employment levels for the year, or on any other basis consistently applied across tax jurisdictions and from year to year. For this purpose, independent contractors participating in the ordinary operating activities of the Constituent Entity may be reported as employees. Reasonable rounding or approximation of the number of employees is permissible, providing that such rounding or approximation does not materially distort the relative distribution of employees across the various tax jurisdictions. Consistent approaches should be applied from year to year and across entities.
13. Under the column titled “Tangible Assets other than Cash and Cash Equivalents”, the Reporting MNE should report the sum of the net book values of tangible assets of all Constituent Entities resident for tax purposes in the relevant tax jurisdiction. With regard to permanent establishments, assets should be reported by reference to the tax jurisdiction in which the permanent establishment is situated. Tangible assets for this purpose do not include cash or cash equivalents, intangibles, or financial assets.
14. Under the column titled “Constituent Entities Resident in the Tax Jurisdiction”, the Reporting MNE should list, on a tax jurisdiction-by-tax jurisdiction basis and by legal entity name, all the Constituent Entities of the MNE group which are resident for tax purposes in the relevant tax jurisdiction. As stated above with regard to permanent establishments, however, the permanent establishment should be listed by reference to the tax jurisdiction in which it is situated. The legal entity of which it is a permanent establishment should be noted (e.g. XYZ Corp – Tax Jurisdiction A PE).
15. Under the column titled “Tax Jurisdiction of Organization or Incorporation if different from Tax Jurisdiction of Residence”, the Reporting MNE should report the name of the tax jurisdiction under whose laws the Constituent Entity of the MNE is organised or incorporated if it is different from the tax jurisdiction of residence.
16. Under the column titled “Main Business Activity(-ies)”, the Reporting MNE should determine the nature of the main business activity(ies) carried out by the Constituent Entity in the relevant tax jurisdiction, by ticking one or more of the appropriate boxes. In this column, if the Reporting MNE chooses the option ‘Other’, then it shall be required to specify the nature of the activity of the Constituent Entity in the “Part C: Additional Information” section.
